SUMMARY

Senior software engineer with five years building web applications in PHP and JavaScript: Laravel backends, React and Next.js frontends, and the Linux infrastructure they run on. Currently maintaining multi-country company-registry platforms at Companies House Insights, covering order and payment flows, notification pipelines, queued and scheduled processing, and MySQL. Comfortable owning a feature from design through deployment.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Sep 2025 – Present

Companies House Insights — Singapore (Remote)

- Develop and maintain the Laravel applications behind company-registry data platforms for Singapore, Indonesia, Thailand, the Philippines, Malaysia and other markets, all served from one shared architecture with per-market configuration, content and data.
- Own order and payment flows end to end, including pricing and promotion rules, activity logging, and safeguards around automated customer email.
- Build queued and scheduled background processing: notification pipelines that react to changes in upstream data, and calendar-aware customer messaging that accounts for business hours and per-market public holidays.
- Take features from design through MySQL schema and migration work to deployment on Linux servers.

Senior Software Engineer

Aug 2024 – Aug 2025

Pakipreneurs — Islamabad, Pakistan (On-site)

- Built backend APIs with Laravel, Nest.js and Express.js across concurrent client projects; promoted to Senior Software Engineer in February 2025.
- Integrated ActiveCampaign, Zapier, GoHighLevel and Keap to automate CRM and marketing workflows for clients.
- Maintained and extended legacy PHP systems on CodeIgniter, Kohana and Koseven while they carried production traffic, adding integrations and automations without rewrites.
- Contributed React frontends and designed relational and document schemas across MySQL, PostgreSQL and MongoDB.

WordPress Developer (Part-time)

Nov 2023 – Feb 2024

Si Web 29 — Multan, Pakistan (Hybrid)

- Managed WordPress projects end to end for client sites, including PSD-to-WordPress builds and on-page SEO.

Senior Laravel Developer (Part-time)

May 2023 – Sep 2023

HashtagWeb — Multan, Pakistan (Hybrid)

- Designed and built RESTful APIs in Laravel for dynamic web applications.

PHP Developer

Dec 2020 – May 2022

Dee Designers — Multan, Pakistan (On-site)

- First engineering role: backend functionality for dynamic websites in PHP, with interfaces in HTML, CSS and JavaScript.
- Contributed inventory and workflow modules to an ERP system used by business clients.

SELECTED PROJECTS

- **Tejarify** — wholesale billing system.
- **Rentive** — property management SaaS.
- **HelpMeOrder** — AI-assisted ordering assistant for restaurants.

TECHNICAL SKILLS

Languages and frameworks: PHP (Laravel, CodeIgniter, Kohana), JavaScript (React, Next.js, Node.js, Nest.js, Express.js)

Databases: MySQL, PostgreSQL, MongoDB, Redis

Infrastructure and tools: Linux (Ubuntu server management, Nginx, Apache), Docker, AWS, Git, GitHub, Jira, Trello

Practices: REST API design, webhooks, queue workers, workflow automation, MVC, Agile/Scrum

Also worked with: Angular, WordPress, Moodle, OJS

Spoken languages: English (professional), Urdu (native)

EDUCATION

Associate Degree in Computer Science, University of Southern Punjab — Multan, Pakistan

2022 – 2024

Frontend Development (React), Zero To Mastery Academy

2022
